▲ *Silicone Round Channel/Fluted Drains (Bonding type)*

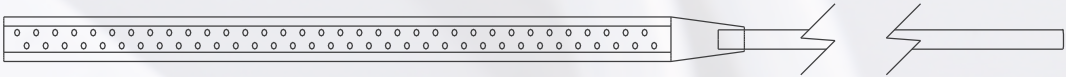

- Made of medical grade silicone.
- Round four channels shape allows for greater multi-channel drainage.
- Channel drain offers important advantages over regular perforated drains by capillary effect.
- Round Drains comes in a two-piece design.
- Round Fluted part include silicone that is barium impregnated for X-ray detection.
- Full fluted and 3/4 part fluted two types available.
- Available with or without "Three Face" stainless steel trocar.

Item No.	Size (Fr)	Type
RCD10-1	10	3/4 Part Fluted
RCD15-1	15	3/4 Part Fluted
RCD19-1	19	3/4 Part Fluted
RCD10-2	10	Full Fluted
RCD15-2	15	Full Fluted
RCD19-2	19	Full Fluted
Remark	Size and length can be customized.	

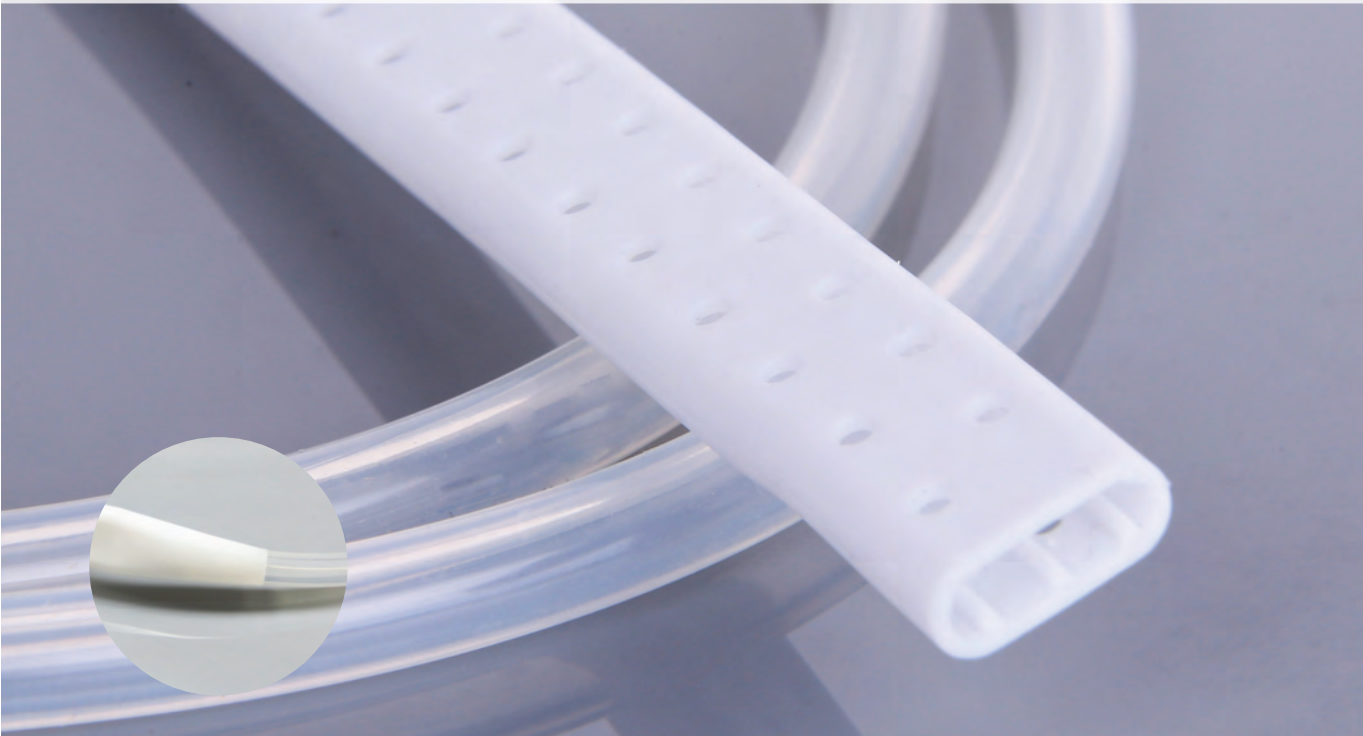

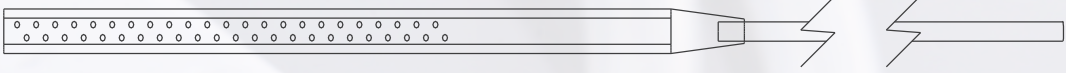

▲ Silicone Flat Perforated Drains

Full perforated

3/4 part perforated

- Made of medical grade silicone.
- Combines a transparent silicone round tube and white perforated flat drain.
- The inner wall of implanted flat segment with tooth-like structure facilitates drainage and lower the risk of occlusion.
- Radio-opaque line through the length for X-ray visualization.
- Full perforated and 3/4 part perforated two types available.
- Available with or without “Three Face” stainless steel trocar.

Item No.	Size (mm)	Type
FD0703	7	3/4 part perforated
FD1003	10	3/4 part perforated
FD0702	7	Full perforated
FD1002	10	Full perforated
Remark	Size and length can be customized.	

▲ Silicone Reservoir

- Made of medical grade silicone.
- Provided with internal anti-reflux valve.
- Bulb silicone walls provide easy activation of suction.
- Luer cap design, more safe and convenient to process when using.
- Regular system is to be used together with silicone flat drains, but we also recommend innovative solutions which are combined with our other silicone drains.

Item No.	Size (ml)	Graduation (ml)
SR100S	100	25/50/75/100
SR150S	150	25/50/75/100/125/150
SR200S	200	50/100/150/200
SR400S	400	100/200/300/400

▲ Silicone Reservoir Bottom Outlet

- Silicone bulbs are suitable for plastic surgery, neurosurgery, orthopaedics, OB/GYN surgery and laparoscopic surgery.
- Bottom outlet design are available for size 100ml and 200ml silicone reservoir.

Item No.	Size (ml)	Graduation (ml)
SR100B	100	25/50/75/100
SR200B	200	50/100/150/200

▲ Drainage Bag

- The drainage bag is designed to be connected with our silicone reservoir to collect, store and record the fluid after the surgeries.
- Be equipped with internal one-way valve to prevent reflux.
- Be equipped with an extension PVC tube and a luer lock to be connected with our silicone reservoir.
- Can be replaced individually.

Item No.	Size (ml)
DB1000	1000

▲ Closed Wound Drainage System

- This product includes silicone reservoir, silicone flat drains or other silicone drains and stainless steel trocar.
- Can use separately or using trocar for insertion and combining with silicone reservoir for fluids suction and collection.
- Provided with internal anti-reflux valve to prevent backflow of fluid to the patient.
- Silicone bulbs are suitable for plastic surgery, neurosurgery, orthopaedics, OB/GYN surgery and laparoscopic surgery.

Item No.	Size (ml)
SDS100	100
SDS150	150
SDS200	200
SDS400	400

▲ **Easy-Vac Suction Reservoir**

- Closed System Design reduces the chance of cross contamination.
- Compact and Self Contained System allows complete patient ambulation.
- Pre-compressed State of Package saves the shipping cost and storage space.
- Y-connector for Bilateral Drainage.
- Attached Stepped Adapters allows connecting to other sizes on demand which facilitates easy connection to drainage system.
- Internal Anti-reflux Valve is incorporated to prevent reverse flow during emptying and reactivation.
- Reclosable Pouring Spout permits convenient emptying of the reservoir unit and system reactivated when required.
- Latex-free Construction eliminates latex-induced allergic reactions.
- Reservoir is available in 2 sizes(200 & 400 ml).

CliniGut

PLAIN CATGUT SUTURES

Tensile strength maintained for 7 - 10 days. Absorption complete in 90 days.
Used in tissues which heal rapidly and require minimum support-ligating superficial blood vessels and suturing sub-cutaneous fatty tissue.

CliniGut

CHROMIC CATGUT SUTURES

Tensile strength maintained for 10 - 14 days. Absorption complete in 90 days. Suitable for gynae procedures, general surgery, urology, approximation of fatty tissue and sub-cutaneous layers.

CliniSorb

VIOLET & UNDYED BRAIDED PGA SUTURES

Predictable absorption 85% of tensile strength at 14 days, 50% at 21 days and 25% at 28 days, absorption complete in 56 - 70 days.
Indications are dental, general skin closure, gynae, plastic, general, orthopedic and urology.

CliniSorb Q

UNDYED BRAIDED PGA SUTURES RAPID ABSORPTION

Tensile strength maintained for 7 - 10 days. Absorption complete in 42 days.
Indications for superficial soft tissue and approximation of skin and soft tissue.

CliniTro

BLUE MONOFILAMENT PVDF SUTURES

A new generation of synthetic, non-absorbable monofilament suture. Excellent handling and tying properties. Inert, very smooth and virtually no memory.
Used in skin closure, vascular and orthopedic surgery.

CliniSilk

BLACK BRAIDED SILICONE SILK SUTURES

Braided multifilament non-absorbable suture. Silicone coated to prevent wicking, very supple, high knot security.
Indicated for soft tissue approximation and ligation.

CliniLon

BLUE MONOFILAMENT NYLON SUTURES

Synthetic monofilament, non-absorbable suture. High tensile strength, low tissue reactivity, non capillarity.
Easy handling and excellent passage through tissue and secure knotting. Used for skin closure, general soft tissue approximation and ligation.

CliniEster

GREEN BRAIDED POLYESTER SUTURES

Synthetic braided non-absorbable suture. High tensile strength. Minimal acute inflammatory reaction.
Suitable for cardiac and orthopedic surgery - tendon repairs, valve replacement.

CliniSolv

VIOLET & UNDYED MONOFILAMENT ABSORBABLE SUTURES

Predictable absorption 70% of tensile strength at 14 days, 50% at 56 days. Absorption complete in 180 - 210 days.
Indicated for skin closure and non-permanent wound support - urology, orthopedic, general and gynae.

CliniMono Q

UNDYED MONOFILAMENT RAPID ABSORBABLE SUTURES

High initial tensile strength diminishing after 14 days. 60% tensile strength at 7 days, 40% at 14 days and absorption complete in 90 days.
Used for skin closure and non-permanent wound support, general, gynae, urology and plastic.

CliniLene

BLUE MONOFILAMENT POLYPROPYLENE SUTURES

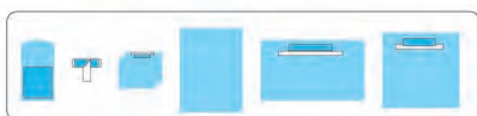

Synthetic monofilament non-absorbable suture. Exceptionally smooth, pliable and soft.
Totally inert, high tensile strength and very good knot security. Indicated for plastic surgery, digestive procedures, cardiac vascular and arteriotomy, general surgery and hernia repairs.

CliniLin

IVORY LINEN SUTURES

Natural linen (flax) sutures. Tensile strength increases when wet.
Linen is soft and pliable, has high knot security and is indicated in ENT surgery.

Wood Paper PE Film Laminated Raw Material Roll

Weight	43g (23gPaper + 20gPE)
Material	Wood pulp paper+PE
Features	1.Good anti-oil, waterproof,air permeability and anti-penetration. 2.Good resistance to bacteria.

1. Applicable to medical composite materials, and production surgical hole towel and surgery drape.
2. Supports customization according to the customer's requirements.

Item No. KPPER-1001

Item No. KFNWR-1002

Film Laminated With Nonwoven Raw Material Roll

Weight	54g (24gSMS + 30gPE)
Material	Impregnated nonwovens + PE
Size	70cm*2000m
Features	1. Soft and comfortable, breathable. 2. Good waterproof, anti-leakage. 3. Tensile strength is good, no stimulation, light.

1. Applicable to medical composite materials, and production surgical hole towel and surgery drape.
2. Supports customization according to the customer's requirements.

Cast Pe Film Raw Material Roll

Weight	27g
Material	PE
Size	80cm*2000m
Features	1. Transparent, soft, waterproof. 2. With high transparency, high flatness, uniform thickness. 3. Good mechanical adaptability. 4. High temperature, low temperature heat sealing, anti-static.

1. Applicable to medical composite materials, and production surgical hole towel and surgery drape.
2. Supports customization according to the customer's requirements.

Item No. KPECR-1003

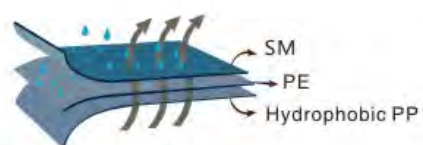

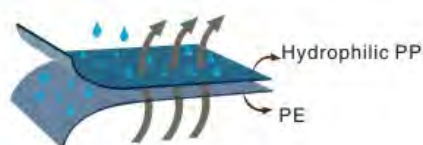

Item No. KCPPR-1004

Composite Paper Raw Material Roll

Weight	57g (23gPaper + 24gPE)
Material	Wood pulp paper+PE
Size	50cm*2000m
Features	1. Good anti-oil, waterproof,air permeability and anti-penetration. 2. Good resistance to bacteria.

1. Applicable to medical composite materials, and production surgical hole towel and surgery drape.
2. Supports customization according to the customer's requirements.

MATERIAL PROPERTIES +

Compound material

Double-layer and three-layer composite materials can effectively block the penetration of liquid and bacteria.

PE film forms an efficient barrier against bacteria; non-woven fabric layer adopts advanced lamination technology, which improves the absorption capacity of non-woven fabric.

PP non-woven fabric layer is soft and comfortable, absorbs liquid, and provides patients with breathable and comfortable environment.

Double-layer composite materials:

Re-assembly of liquid-absorbing surface and impermeable PE membrane

Scope of application: surgical scarf

Three-layer composite material:

Compound of liquid-absorbing surface, anti-permeability PE membrane and comfortable PP

Scope of application: surgical scarf

SMS

SMS is a three-layer composite material, which is composed of spunbonded layer and melt-blown layer. It has strong tensile strength, tear strength and is not easy to tear.

Good air permeability, the most comfortable protection for patients or medical staff

After special treatment of SMS, it has three resistance properties: anti-alcohol, anti-blood, anti-fat (medicine called anti-III)

Scope of application: surgical cave towel, surgical clothing, sterilization wrapping

Reinforcing materials

SMP multi-layer composite liquid-absorbing material can absorb liquid up to 7 times its own weight, large liquid-absorbing capacity, high liquid-absorbing speed, and keep dry a-PE film material on the surface, which can prevent liquid penetration, form multiple protection, good tensile strength in dry and wet state, and is suitable for high liquid flow surgery.

Scope of application: Enhanced fluid aspiration materials in key areas of surgical cave towel operation

Double-layer composite liquid-absorbing material, composed of low-g-weight PP and impermeable PE, prevents the infiltration of liquid and bacteria

Scope of Use Operating Clothing Reinforcement Protective Material

STERILE BARRIER SYSTEM

Wrapping Material Non-woven-SMS/SMMS/SMMMS Fabric

Mcpack SMS, SMMS and SMMMS non-woven fabric are an extraordinarily water-proof and resilient non-woven material made of polypropylene fabric layers. They can be used either as inner or outer wrapping for medical devices and trays and available in 40g regular weight, 50g heavy duty and 60g multi-pac.

SMS, SMMS and SMMMS wraps as single or double wrapped are suitable for steam, ethylene oxide, hydrogen peroxide plasma and irradiation sterilization methods. The memory-free feature before and after sterilization, ensures good aseptic presentation.

Comparison of SMS, SMMS and SMMMS Non-woven Fabric with 40g, 50g and 60g.

	Layers	Construction	Features	Weight	Features
SMS non-woven fabric	three	two layer spunbond; one layer meltblown nonwovens inside	waterproof, breathable, anti-bacterial, Low Shrinkage Rate	SMS/SMMS/ SMMMS 40g	Light duty applications
SMMS non-woven fabric	four	two layer spunbond; two layer meltblown nonwovens inside	waterproof, Good Air Permeability better anti-bacteria, resistance to tears and punctures	SMS/SMMS/ SMMMS 50g	All kind of wrapping applications
SMMMS non-woven fabric	five	two layer spunbond; three layer meltblown nonwovens inside	waterproof, higher protection and high level of permeability, strong resistance to tears and punctures	SMS/SMMS/ SMMMS 60g	Heavy duty applications

The spunbond layers(S) provide good filtration properties, tensile strength and are fluid repellent while the meltblown layers(M) ensure strong bacterial barrier properties with very small porous sizes.

- Standard Packing: 10pcs/bag, 100pcs/carton
- Application: SPA, beauty, hospital.

axiostat[®]
stops bleeding, instantly

powered by
**Protonated
Bioadhesive
Technology
(PBT™)**

dedicated
to **stop
bleeding**

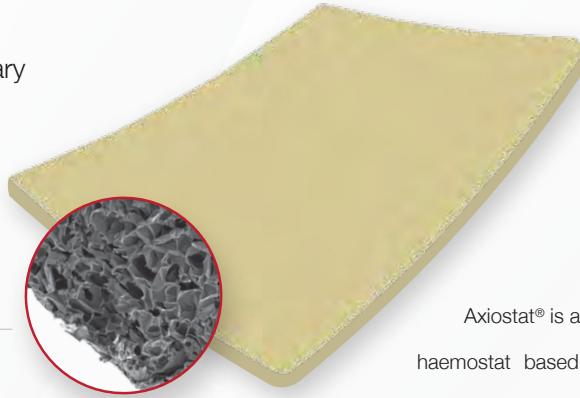

www.axiostat.com

FDA
510(k)

CE
2460

Axiostat® is a sterile, single use, non-absorbable **haemostat** intended to be used for temporary control of moderate to severe **bleeding**.

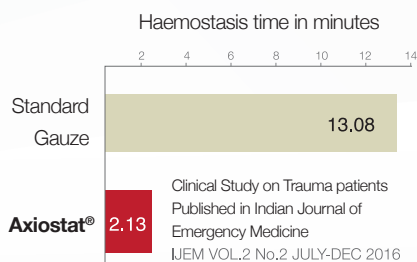

Axiostat® is a bioactive haemostat based on the unique Protonated Bioadhesive Technology (PBT™). It works on a unique charge based mechanism of mucoadhesion which forms a mechanical barrier to the bleeding site.

Axiostat® is manufactured in **ISO13485:2016** certified facility.

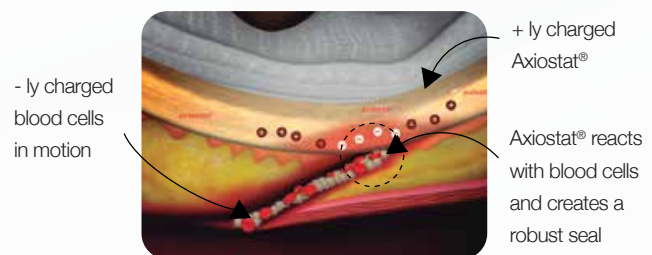

- Effective on patients on **blood thinners**
- **Active** on all sides
- **Hypoallergenic**, no known side-effects
- **Can be cut, folded**, stuffed into deep wounds
- Gamma **Sterilized**
- **Biocompatible**
- Easy to **Apply & Remove**

Axiostat® is **India's first** **USFDA** cleared Haemostat
